

## KEY INFORMATION DOCUMENT– LONG POSITIONS IN SINGLE STOCK FUTURES AND FORWARDS

### PURPOSE

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, cost, potential gains and losses of this product and to help you compare it with other products.

**You are about to purchase a product that is not simple and may be difficult to understand.**

**PRODUCT: EXCHANGE TRADED DERIVATIVES – LONG POSITION IN SINGLE STOCK FUTURES OR FORWARDS**

**Manufacturer:** Nasdaq Stockholm AB. For more information, go to [www.nasdaq.com](http://www.nasdaq.com) or call +46 8 405 6000

**Competent authority:** Swedish Financial Supervision Authority

**Date of production:** April 11, 2022

### WHAT IS THIS PRODUCT?

**Type:** Derivatives. Stock Futures/Forwards are considered a derivative under Annex I Section C (4) of MiFID II (the Markets in Financial Instruments Directive) 2014/65/EU. The product is denominated in Swedish Krona (SEK), Danish Krone (DKK), Norwegian Krone (NOK) or Euro (EUR) depending on the currency of the underlying instrument.

**Objectives:** A Stock Future/Stock Forward give the buyer (long position) the obligation, during the fixed period stated in the Contract Specifications, to buy a specified amount of the underlying instrument at the price agreed upon between the buyer and seller.

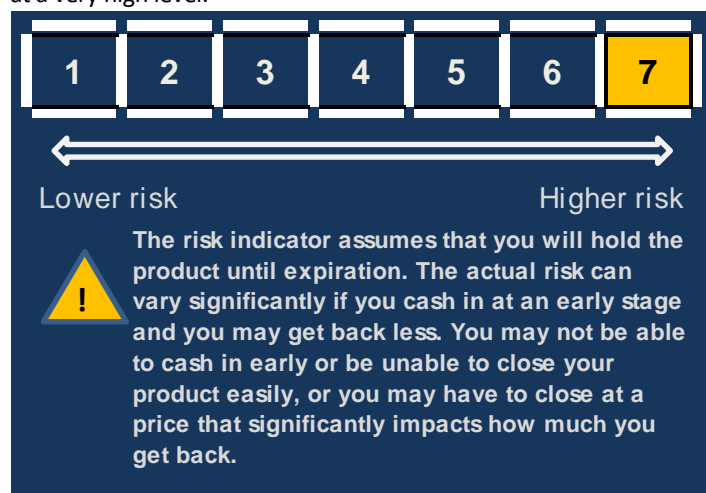

Each Future/Forward series has its own expiry date, after which the product will expire. The times at which a Future/Forward can be exercised are set out in the Contract Specifications.

Positions in single stock Futures/Forwards can be subject to adjustments due to corporate actions in the underlying stock (e.g. a takeover of the underlying company, a rights issue, etc.). The corporate action policy is available on [www.nasdaq.com](http://www.nasdaq.com).

**Intended retail investor:** The target market includes retail clients, professional clients and eligible counterparties who pursue an objective of general capital formation or capital optimization, of a disproportionately high participation in price fluctuation or of hedging and who have a short-term, mid-term or long-term investment horizon. The potential client does not attach importance to capital protection (repayment of the invested amount is not guaranteed). The product is suitable for clients with extensive or specialized knowledge and/or experience in financial products, which is to be validated and documented by the intermediary/distributor.

### WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from the future performance at a very high level.

The risk indicator assumes that you will hold the product until expiration. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early or be unable to close your product easily or you may have to close at a price that significantly impacts how much you get back.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Your maximum loss (long position) would be equal to any decline in the price of the underlying.

**Holding a position in other currency than your own means that you also have a currency risk.**

**PERFORMANCE SCENARIOS**

This graph illustrates how your investment could perform. You can compare it with the pay-off graphs of other derivatives. The graph gives a range of possible outcomes and is not an exact indication of the return you could expect. Your return will vary depending on how the underlying instrument performs. For each value of the underlying instrument, the graph shows what the profit or loss would be on the product. The horizontal axis shows the various possible prices of the underlying value on the expiry date and the vertical axis shows the profit or loss.

**LONG POSITION ON FUTURES**

Buying this product holds that you think the underlying price will increase.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you receive as a return. The tax legislation of your home state may have an impact on the actual payout.

The profit or loss potential of a Single Stock Future/Forward on its expiry date depends on the price of the underlying instrument and the price you paid for the Future/Forward. Additionally, the potential to make a profit or loss of the Future/Forward is highly dependent on the way the position is used, e.g. Futures/Forwards can be traded as a risk management tool to hedge other investments or used as a stand-alone investment.

Profit/loss calculation for holding a Future/Forward at expiration: Step one: Take the price of the underlying instrument less the price you paid for the Future/Forward. Step two: Futures/Forwards are priced per unit of the underlying instrument and the previous calculation determines the result per unit of the underlying instrument, but the total value of a Future/Forward Contract depends on the contract multiplier. The total profit or loss of a Future/Forward is therefore calculated by multiplying the value obtained in step one by the contract multiplier.

The profit or loss of a Future/Forward is zero when the underlying instrument has a price that is equal to the price paid for the Future/Forward.

The profit and loss calculation in formulas: Total profit or loss: (P-F) \* contract multiplier [if relevant], where P is the underlying asset's market price and F is the price you paid for the Future/Forward. The profit/loss is zero where P = F.

**WHAT HAPPENS IF NASDAQ STOCKHOLM AB IS UNABLE TO PAY OUT?**

Nasdaq Stockholm AB is not responsible for paying out on the investment and the investment is not covered by an investor compensation or guarantee scheme. The product is cleared by Nasdaq Clearing AB which has in place risk policies and a Default Fund in line with the applicable legislation.

**WHAT ARE THE COSTS? COST OVER TIME AND COMPOSITION OF COSTS**

Nasdaq Stockholm AB charges fees which are applied to the exchange trading member. The transaction fee for this asset class is 0.02% of the Future/Forward price (fee cap and other conditions apply). The fee schedule is available in the price list on our website: <https://www.nasdaq.com/solutions/rules-regulations-derivatives-rules>

Investment EUR 10,000 or DKK, NOK, SEK 100,000			
Scenarios	If you cash in after 1 year	If you cash in at the expiry	
<b>Total costs</b>	EUR 4 or DKK/NOK/SEK 40	EUR 4 or DKK/NOK/SEK 40	
Impact on return (RIY) per year	-1.33%	-1.33%	
<b>Composition of Costs: This table shows the impact on return per year</b>			
One-off costs	Entry cost	0.02%: EUR 2 or DKK/NOK/SEK 20	The impact of the cost you pay when entering into your investment
	Exit cost	0.02%: EUR 2 or DKK/NOK/SEK 20	The impact of the cost of exiting your investment
On-going costs	Portfolio Transaction Cost	Not applicable	The impact of the cost of us buying and selling underlying investments for the products.
	Other on-going-cost	Not applicable	The impact of the cost we take every year for managing your investment.
Incidental costs	Performance fees	Not applicable	The impact of the performance fee. We take these from your investment if the product outperforms its benchmark.
	Carried interests	Not applicable	The impact of carried interest

The annual performance is assumed to be 3%. The table assumes a 12-month duration. The cost shown is the most you will pay and you could pay less. The cost is not affected on whether you cash in during or at the end of the recommended holding period. Further or associated costs may be charged to retail investors by the exchange trading member, brokers or other intermediaries involved in a retail derivative transaction. There are no recurring or incidental costs for this product.

**HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?**

There is no recommended holding period for this product. Futures/Forwards can be held until expiry. Whether or not retail investors choose to do so will depend on their investment strategy and risk profile. A Future/Forward position can be closed by entering a sell order in the market.

**HOW CAN I COMPLAIN?**

Retail investors should address complaints to the broker or intermediary with whom the investor has a contractual relationship in relation to this product. You can call Nasdaq Stockholm at +46 8 405 6000.
